# Admission decision recording: the reviewer-only edges

Story `admissions.CAP.admission_decision_recording` · capability `admissions.admission_decision_recording` · prepared 2026-11-12

Platform evidence: `ColaberryIntern/ColaberryEnterprise_AI_LeadershipAccelerator` at commit `dbc7d069d2590052696ed8cd4f509d1762ad0961` (8:03 AM CST on 2026-11-12). Every platform `file:line` below was checked at that commit. Paths starting `.colaberry/` or `docs/stories/` are in this repo.

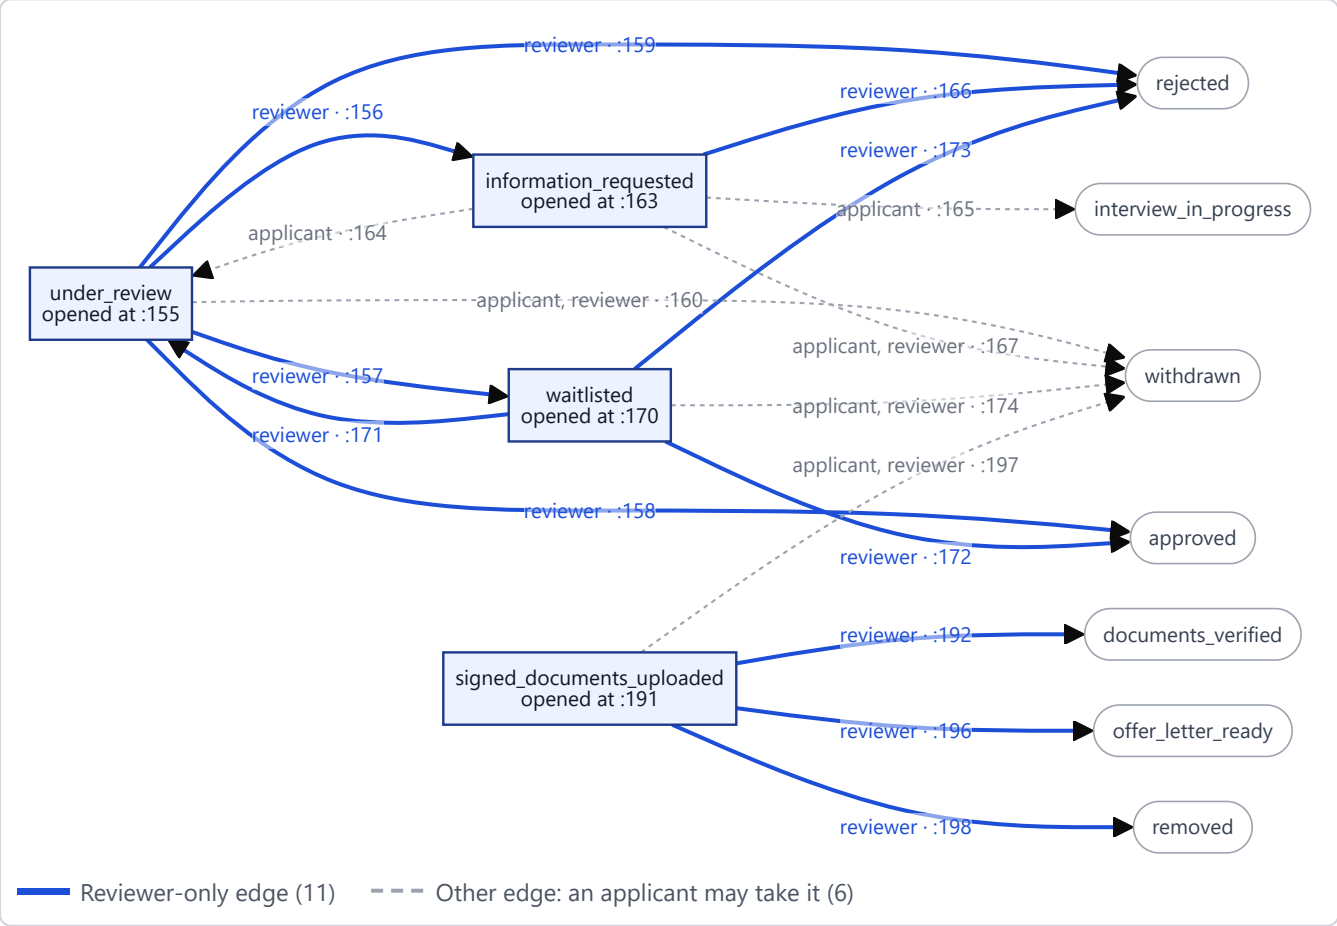

**This is a human decision. An agent may prepare, summarise and propose; it may never decide.**

Ceiling: `autonomy:R2` ( `.colaberry/agent-domain.json:36` , `max_permitted_autonomy` ). Effective today: `autonomy:R0` , reason `human_decision_required_at_every_level` ( `:30-32` ).

● Document complete ● Accountable human pending confirmation ● Not ticked in progress.json

## The four states and every edge out of them

From `backend/src/services/internship/internshipStateMachine.ts` . The comment at `:154` reads "The human gate. Every admission outcome is reviewer-only."

## The 11 reviewer-only edges

| From state | To state | Actors allowed | file:line | Accountable human |
|---|---|---|---|---|
| `under_review` ( `:155` ) | `information_requested` | reviewer only | `internshipStateMachine.ts:156` | Taiwo Oludimimu Pending confirmation |
| `under_review` ( `:155` ) | `waitlisted` | reviewer only | `internshipStateMachine.ts:157` | Taiwo Oludimimu Pending confirmation |
| `under_review` ( `:155` ) | `approved` | reviewer only | `internshipStateMachine.ts:158` | Taiwo Oludimimu Pending confirmation |
| `under_review` ( `:155` ) | `rejected` | reviewer only | `internshipStateMachine.ts:159` | Taiwo Oludimimu Pending confirmation |
| `information_requested` ( `:163` ) | `rejected` | reviewer only | `internshipStateMachine.ts:166` | Taiwo Oludimimu Pending confirmation |
| `waitlisted` ( `:170` ) | `under_review` | reviewer only | `internshipStateMachine.ts:171` | Taiwo Oludimimu Pending confirmation |
| `waitlisted` ( `:170` ) | `approved` | reviewer only | `internshipStateMachine.ts:172` | Taiwo Oludimimu Pending confirmation |
| `waitlisted` ( `:170` ) | `rejected` | reviewer only | `internshipStateMachine.ts:173` | Taiwo Oludimimu Pending confirmation |
| `signed_documents_uploaded` ( `:191` ) | `documents_verified` | reviewer only | `internshipStateMachine.ts:192` | Taiwo Oludimimu Pending confirmation |
| `signed_documents_uploaded` ( `:191` ) | `offer_letter_ready` | reviewer only | `internshipStateMachine.ts:196` | Taiwo Oludimimu Pending confirmation |
| `signed_documents_uploaded` ( `:191` ) | `removed` | reviewer only | `internshipStateMachine.ts:198` | Taiwo Oludimimu Pending confirmation |

"Accountable human: Taiwo Oludimimu" is stated in this story's brief, `.colaberry/plan.json:112` (also `docs/stories/admissions.CAP.admission_decision_recording.md:27`). The platform's domain registry names her identity as the admissions domain's manager at `backend/src/services/agentDomain/agentDomainRegistry.ts:144-147`. `.colaberry/agent-domain.json` has no accountable-human field; it mentions her only inside capability ceiling reasons (for example `:136`, `:342`).

> `docs/AI_INTERNSHIP_SPEC.md:186-197` names Dhee as the approver of internship applications. The platform team has been asked which applies.

## How the human gate is enforced

**Six decision verbs, and nothing else**
The request schema accepts only `approve`, `approve_with_conditions`, `reject`, `waitlist`, `request_information`, `schedule_human_follow_up`, and rejects unknown fields (`backend/src/routes/admin/internshipRoutes.ts:71-87`). Each maps to a state in `REVIEWER_DECISIONS` (`internshipStateMachine.ts:307-314`). The route is `POST /api/admin/internship/applications/:id/decide`, behind `requireSection('internship')` (`internshipRoutes.ts:651`).

**Reason codes from a closed list**
The schema allows only a code in `REASON_CODES` (`internshipRoutes.ts:80-83`; list built at `internshipReasonCodes.ts:192` from `REASON_DEFINITIONS` at `:63`). `decide()` refuses an unknown code, a code that does not apply to the decision, and a code that needs a message when none was written (`internshipDecisionService.ts:109-126`; rule at `internshipReasonCodes.ts:210`).

**No override, force or isAdmin parameter**
`canTransition(from, to, actor)` takes exactly three arguments and allows a move only if the table lists that actor on that edge (`internshipStateMachine.ts:264-279`). `decide()` always passes `actor: 'reviewer'` (`internshipDecisionService.ts:166-171`). The `system` actor, which an AI recommendation authenticates as, is listed on none of the 11 edges above (`internshipStateMachine.ts:20-29`).

**decided_by comes from the session, never the request**
`decided_by` is a required column (`backend/src/models/InternshipDecision.ts:64`). The route takes it from the signed-in token's email or subject, not the body (`internshipRoutes.ts:658-663`), and `decide()` writes it (`internshipDecisionService.ts:182`). If the token carries neither, the value recorded is the literal `'unknown-admin'` (`internshipRoutes.ts:663`).

## Out of scope: the other 11 reviewer-only edges

Also reviewer-only in `internshipStateMachine.ts`, but outside the four states the acceptance line names. Listed so nothing is hidden; not enumerated for an accountable human here.

| From state (opened at) | To state | Actors allowed | file:line |
|---|---|---|---|
| `approved` (`:179`) | `removed` | reviewer only | `internshipStateMachine.ts:182` |
| `offer_letter_ready` (`:185`) | `removed` | reviewer only | `internshipStateMachine.ts:188` |
| `documents_verified` (`:201`) | `removed` | reviewer only | `internshipStateMachine.ts:205` |
| `payment_pending` (`:208`) | `removed` | reviewer only | `internshipStateMachine.ts:212` |
| `activation_pending` (`:215`) | `removed` | reviewer only | `internshipStateMachine.ts:218` |
| `active` (`:221`) | `paused` | reviewer only | `internshipStateMachine.ts:222` |
| `active` (`:221`) | `completed` | reviewer only | `internshipStateMachine.ts:223` |
| `active` (`:221`) | `removed` | reviewer only | `internshipStateMachine.ts:225` |
| `paused` (`:228`) | `active` | reviewer only | `internshipStateMachine.ts:229` |
| `paused` (`:228`) | `completed` | reviewer only | `internshipStateMachine.ts:230` |
| `paused` (`:228`) | `removed` | reviewer only | `internshipStateMachine.ts:232` |

## Stale in the brief

- **"Taiwo Oludimimu has no admin login"**: out of date at platform commit `d68f595`, and still at `dbc7d06`. The registry records a correction dated 2026-10-15: she has a full admin login (`agentDomainRegistry.ts:148-174`), `can_reach_surface: true` (`:175`) and `blocker: null` (`:176`).
- **`agentDomainRegistry.ts:155` for "no AI employee"**: out of date at `d68f595`. Line 155 is inside that correction comment; the domain's `agent_id: null` is at `:177`.
- **`internshipRoutes.ts:650` for the decide route**: at `dbc7d06`, `:650` is the route's comment and the route itself is `:651`.

---

Facts only from the code at the commits named, each with its file:line. Nothing here was ticked in `.colaberry/progress.json`; the accountable human must be confirmed first. No personal data: no email addresses, applicant records or decision rows. Diagram drawn with Mermaid 10.9.1 and embedded as SVG.
